## Mrs. Lillian Boles, 82, Found Dead at Home

Mrs. Lillian Mae Boles, 82, who lived alone at 401 Kirkpatrick Homes, was found dead in the kitchen of her home at 11:45 a.m. Tuesday by Sam Friley, 3164 Jill avenue, a maintenance supervisor at the housing project, and James Taylor, 3208 Kirkpatrick Homes.

The two men, who forced the door open to gain entry into the apartment, had been alerted by concerned neighbors who knew Mrs. Boles was in poor health. She was pronounced dead at the scene by Deputy Coroner Alvin Cease, who said death probably occurred about 2 a.m. Tuesday. An inquiry is pending.

Mrs. Boles had lived in the Granite City area about 20 years. She was born in Clinton, Mo., and previously had made her home in Chicago. Her husband, George Boles, died in 1923. There are no immediate survivors. Funeral services were held today. Details are given elsewhere in this issue.

IT'S A HOME-TOWN product, Carl Pashoff of Granite City remarked of the corrugated steel making up protection against mortar fire at Cu Chi, Vietnam, where he is assigned as a civilian worker. The steel pipe bears the marking: "Granite City Steel Co."

## Carl Pashoff, in Vietnam, Says Fighting 'Stronger'

Carl Pashoff, 3113 Fehling road, Pashoff has been a technical manual writer and editor, a combat activity just like any property administrator, patterned after the first one hit by mortar activity in Vietnam. He is expected home later this month.

"We had a mortar attack," he relates in his letter to his brother, but thanks to my previous Army experience, I was in my bunker right after the first one hit. They did not do too much damage this time, but we had about 62 casualties on the base."

Writing under the date of April 1, Pashoff said in his letter: "Last Sunday I was a guest of honor over at A Company 2nd Aviation Battalion. Major Brown, the C.O., in his speech praised the work we are doing. One night we worked until 4 a.m. but we got the gun ship ready for the morning fight. He (Major Brown) said by having that extra ship, we saved about 250 American lives."

"This made me feel real good. I thanked him and my men for a job well done."

## IN 1938 PALM BEACH UNCRUMPLED THE SUMMER SUIT

The summer suit you put on in the morning was a dish rag by afternoon, until Palm Beach\* pioneered with the first wrinkleless fabric blends.

Tailoring blend fabrics demanded totally new techniques. It gave birth to the "Engineered Suit"—Palm Beach's way of tailoring a suit so it didn't depend on pushing, pulling, pressing. Instead it cut shape right into the fabric and sewed fit into the suit. Results were so superior at such a reduction in costs, that Palm Beach now engineers all their suits.

## Tour of NASA Planned

## 105 GCHS Band Members To Play Concert in Texas

Approximately 105 members of the Granite City high school band will take part in this year's annual out-of-state trip to Houston, Tex., Louis Meek, GCHS band director, informed parents at a meeting Tuesday evening. Nine adult chaperones will accompany the group.

Students will make the tour aboard three buses, departing from Granite City on Saturday, April 29, and returning home, Thursday, May 4. While in Texas, the local music students have accepted an invitation to perform at the Westbury senior high school in Houston, Meek said.

Other activities arranged as part of the group's itinerary, include tours of the National Aeronautics and Space Administration Center, San Jacinto Memorial Park and the battleship Texas, the band director reported. A day-long excursion also is planned to the Gulf coast resort area near Galveston, Tex.

About 35 persons attended the tour information session, held in conjunction with the April meeting of the Granite City Band Parents Association in the high school band room.

Bernard Shepard, association president, conducted the business meeting, and other reports were given by Mrs. Charles Landis and Gilbert Hall. Mrs. Leroy Jung, supervisor of the band's recent tag-day sale, expressed appreciation to parents and students who participated in the 1967 fund-raising drive. Money raised through the sale of tags assists in defraying expenses on the annual band tour, she said.

Refreshments were served by Mrs. Jun and Mrs. Clyde Bradford. The association's next meeting will be Tuesday, May 9.

## Warriors Rally in 6th. Beat E. St. Louis 4-3

Trailing 3-1 until the sixth inning, the Granite City Warrior baseball team went on to tie and then win 4-3 over East St. Louis in an eight-inning road game Tuesday.

Wednesday's game here with Collinsville was postponed due to rain.

Joe Fedora, Warrior baseball coach, summarized the game by saying, "We won on luck. Both teams played a poor defensive game. The pitching was good, however."

Granite City had four hits and five errors in the Southwestern conference game, compared to the Flyers' four hits and four errors.

Jim Stuart scored the winning run in the top of the eighth. After beating out an infield hit, he stole second base, went to third on a balk and scored on a passed ball.

With CCHS trailing in the sixth, Steve Conway singled driving in runners from second and third and moving the War-

riors ahead 3-2.

In the seventh inning, East St. Louis came back to tie the score with back-to-back doubles.

The Warriors had led off the scoring in the first inning, but the Flyers ended the inning ahead 2-1.

Tense moments developed in the last of the eighth inning with runners at first and third. Warrior Steve Lengyel had struck out a Flyer for the second out, and Willie Brown then hit to Shortstop Gary Simpson. In the near-darkness, Simpson did not see the ball until it bounced, but managed to catch it and throw to first base in time for the third out.

Don Rains pitched most of seven innings for the Warriors and was relieved by Lengyel. The Warriors will have their problems this week. For Carl Benton and Jeff Jones are out of play. Benson, leftfielder, is out with an injured hand sustained when he was struck by a pitch. Jones, centerfielder, is out with a cold.

The Warriors' No. 2 starting pitcher, Jim Becker, is out with the flu.

## 'A' Rating for Pool at YMCA

The YMCA swimming pool has earned an "A" classification in an annual inspection conducted by the Illinois Department of Public Health, William L. Harris, "A" board president, announced this week.

The certificate, based on 32 requirements adopted by the department for sanitary control of swimming pools, indicates that the local YMCA scored 89.5% of a possible 100.

The requirements cover pool facilities, dressing rooms, water treatment and operation.

Harris said the "A" will continue to strive for an "AA" rating with a score of 95 and 100. This past year, a new water temperature control system was installed, and the ventilation system was re-calibrated and balanced.

## GC DeMolays Lose in Tourney Semifinals

Granite City led near the end of the game by three points, but Wood River gained the lead and held it in the final seconds. Playing for the local chapter were Tom Ylikopas, who had 14 points, Terry Waffer, 13 points, John Burgess six, Jim Fitzpatrick, Harold Tanksley, Charles "Jo Jo" Johannmeier, Harlan Scheibal, Rich Branding, Fred Darnier and Bob Cawley.

## 'Batter Up' Sunday as 3 Local Inter-City Teams Begin Season

Probable lineups for the three local teams playing in the Southwestern Illinois Inter-City Baseball League for their season-opening games Sunday afternoon, April 16, were announced today by the team managers.

Pitching for Mercer Funeral Home will be Bruce Thompson, backed up by Ron Parker. Mercer, which finished with a record of 18-4 last season, was champion of the Inter-City Blue Division.

Coach Ollie Miller reports that a complete lineup probably will not be decided until the day of the game. Mercer will travel to Maryville for its opener with John Lucas' Maryville Red Sox at the Vernon Lucas Field.

The team roster includes Arvil Taylor, Marvin Brokaw, Larry Ripka, Terry French, Greg Patton, Harold Tanksley, Charles "Jo Jo" Johannmeier, Harlan Scheibal, Rich Branding, Fred Hoffman and three players recruited from the defunct Mitchell A.C. team, Dave Sparks, Tony Root and Wayne Gavitt.

The Mercer team is managed by Don Crabtree.

John Rains and Steve Leik will divide mound duty for Manager Adrean Rains' Granite City Hearts in their opener at Wilson Park, Granite City, against Martin Rhyme's East Alton squad.

Other starting players will include Roy Logan, Bob Finkle, Bob Keltner and Larry Corey. Rains won eight games and Leik won six last season.

New to the Inter-City League, but not to area baseball, is the Granite City Steel Credit Union team managed by Ralph Richter.

St. Khoury Titleholder

Last season, the team won the Illinois-Missouri Khoury League senior division championship with an 18-2 mark. Credit Union sports a notable 54-4 three-year record. It will vie with Jim Crook's Moltor Motors at Fletcher Field in Collinsville for the season opener Sunday.

Pat Harris will pitch for Credit Union with Larry Anderson at first base, Barry Sykes at second, George Skyes at third base, Rick Reutshel behind the plate, Rick Whistler in right field, Dave Sartin in center field and Nick Podoba in left field.

Other opening pairing Sunday are the Pochontas Braves, managed by Harland Zobrist, vs. Paul Levo's Troy Red Birds at Hartman's Moonlight diamond, and Jim Hiedrich's Collinsville's Utes vs. John Wiegus' Polish-American War Veterans at Jones Park, Diamond No. 1, East St. Louis.

## Trojans Drop 11-1 Game at Cahokia Field

The Madison Trojans failed to recover from a fifth-inning blizz of runs and were defeated 11-1 by the Cahokia Comanches at Cahokia Monday. The Trojans' game here with Dupe scheduled for Wednesday was postponed because of rain.

Trojan pitcher Harold James, a southpaw, was sent in to relieve Don Bunk, due to the large number of left-handed Comanche hitters. However, James walked three and Cahokia scored its final seven runs. Larry Wilkie pitched the final inning for Madison.

The Trojans scored their run in the third, and missed scoring chances in the second and fifth innings. Bunk and Dal Clinton singled in the third, Jim Scott hit into a fielder's choice and Bunk scored as Bill Campbell hit a "blooper" behind the pitcher.

In the second inning the Trojans had runners on first and third with no outs, but a grounder, fly and strikeout retired the side.

In the fifth inning, runners were left stranded on first and third. Madison totaled seven hits but committed seven errors.

## 11,852 Granite City Autos; 13,500 Real Estate Parcels

If local streets seem crowded, it is not surprising. An annual public report today by Granite City Assessor James Barton shows 11,852 autos on the assessment rolls with a total assessed value of \$5,792,030.

There are 830 trucks and trailers assessed in Granite City at a total of \$574,530. Household furniture and furnishings amount to \$2,888,890.

Of the 1966 valuation established by the assessor, \$159,525,615, the amount assessed as personal property is \$68,279,835.

Over 78% of the personal property is charged against 17 large companies, utilities and three banks.

Over 30% of the \$159,525,615 overall total is listed for one corporation, Granite City Steel Co. Its valuation of \$48,418,060 includes \$33,249,830 personal property and \$15,168,230 real estate.

**907 Business Firms**  
"In 1966, Granite City township had personal property listings for 907 businesses and individual personal property returns for 10,899 individuals," Barton related.

"We received and made 1091 property transfers for real property in 1966. This information had to be posted on three sets of record cards and whichever set

of books we pick up the duplicate books and they must be kept up-to-date. This includes current owner's name and address.

"In addition, we prepared a list of 947 property transfers for the city; they do not want information on vacant lots or property not on sewer lines.

**\$60 Million New Growth**  
"Grand summary of locally assessed property for Granite City township in 1966 was \$160,335,655. This does not include state-assessed railroad property and capital stock. This compares with a grand total of \$154,140,915 in 1965, an increase of \$6,194,740.

"The deputy and clerk account of \$18,000 was expended as follows: "Distribution of personal property tax returns for individuals, making backcalls either in person or by telephone, 3380 1/2 hours, \$4787.75; posting individual personal property books, extra deputies, 640 hours, \$768; distribution of business checking, checking outside deputies' work and supervisory work, postal business book and individual books and balancing them, and checking and filing state identification tags, (all of this work done by fulltime help), \$7020; and checking building permits for additions to property and new construction, \$4200.

gallon in gasoline taxes and a flat license fee of \$24 on all passenger cars was recommended by the Illinois Highway Study Committee. If the General Assembly adopted the recommendations, the proposed increase in the present five-cent gas tax would bring in an additional \$108 million per year.

The proposed \$24 license fee would increase license fees on all cars. They now range from \$7 to \$23.

Their new recommendations call for increased diesel fuel taxes, increasing truck registration fees from 10 to 50% according to weight categories, creating a board to review classification of roads as state or local responsibility, and setting up a road priority commission.

A bill designed to run B-girls out of Illinois bars was approved unanimously by the Senate Judiciary committee. The bill would prohibit unescorted females from soliciting drinks in any bar.

**Approve Drunk-Driving Law**  
Legislation already passed by the Senate that would tighten drunk driving laws in Illinois was

"Total amount spent was \$17,068.75, leaving a balance of \$941.25 from the \$18,000.

**\$1884 Net Balance**  
"All accounts but two showed a balance as of March 1, 1967: janitor and supplies, \$21 balance; utilities, \$9 with \$38 credit; office expenses, \$488; maintenance on office equipment, \$11; municipal retirement and social security, \$351; deputy and clerk account, \$941 balance; telephone, \$83 deficit; and travel and expenses, \$200 deficit.

Total balance as of March 1 was \$1584.

"Travel and expenses were overspent because the February 1966 travel bill was not approved by the council until March and therefore has to be charged to this year's budget year.

**Quadrant This Year**  
"For the 1967 assessment year the new tax books list approximately 13,500 parcels of real estate. Since this is the quadrantal year, each one of these parcels will have to be viewed and re-appraised.

"This information will then be broken down as to the value of the land and improvement. After this information is placed in the books and balanced, it then must be posted in the records.

"This means that this new as-

essed valuation must be posted in a total of four places—the original tax books, the 1d (for outside work) legal cards, the office file of legal cards and the address file.

"We have to have a cross-file by address, as the majority of persons calling for this information do not know or have their legal description.

"Estimated breakdown of the deputy and clerk account of \$18,000 for 1967-68 is: outside deputies for distribution and posting, \$8000; inside deputy clerk, \$3300 and \$4170; and real estate clerk, \$2000, a total of \$17,670.

"The 1967-68 Budget of \$42,810 is less than .0003% of the total assessed valuation of Granite City township," Barton pointed out.

**Office Costs Less Here**  
"It is interesting to note that in Alton township, the chief deputy assessor received \$6380, compared to \$3580 in Granite City; the draftsman \$4860, compared to none here; full-time clerks \$3860 and \$3120, compared to \$4170 and \$3300 in Granite City; and the appraiser \$5000, compared to \$4500 here.

The total 1967-68 budget for the Granite City township assessor's office is \$42,810, compared to \$51,250 in Alton township for the same year.

"Alton is approximately the same size as Granite City and our assessed valuation is fairly close: Granite City's assessed valuation is higher.

"Alton does not have to pay rent or janitor service, as its assessing office is in the city hall. Also, its \$51,250 budget lists no provision for the retirement fund or social security; in Granite City budget these items amount to \$8480.

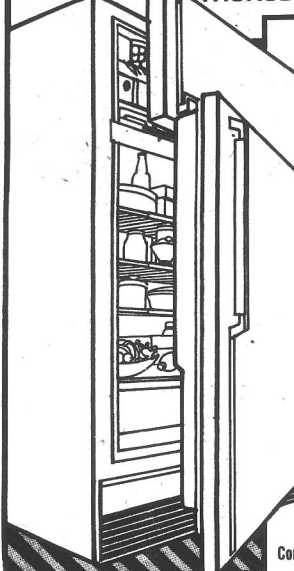

"Champaign township, with a 49,000 population, has a 1967-68 assessor's budget of \$54,700. Quincy township, with a 43,793 population has a \$38,972 budget.

"Elgin township, with a population of 49,447, has a 1967-68 budget for the assessor of \$114,756, compared to our \$42,810. "A breakdown of our \$42,810 budget shows the \$18,000 for clerks and deputy assessors, \$890 for janitor and supplies, \$1500 for rent, \$300 for utilities, \$900 for telephone service, \$1850 office expenses, \$350 maintenance on office equipment and \$3000 township share of municipal retirement and social security."

## Senate Committee Gives Ok for Con Con

The Senate Executive committee of the Illinois General Assembly recommended for passage Tuesday a proposal providing for a state constitutional convention.

The committee vote was 20 to one. A two-thirds majority vote is required in each the Senate and the House to put the proposal on a ballot for a statewide referendum in the November 1968 election.

If the people approved the proposal, the 1969 General Assembly would set up rules for electing delegates to the convention—two from each of the 55 senatorial districts.

In other action at Springfield the Illinois House honored the late Frank Holten of East St. Louis, who died last January after serving 46 consecutive years as a state representative. The House adopted unanimously a bill changing the name of Grand Marais park in East St. Louis to Frank Holten State Park. The bill already had passed the Senate and now goes to the governor for his signature.

An increase of three cents per

gallon in gasoline taxes and a flat license fee of \$24 on all passenger cars was recommended by the Illinois Highway Study Committee. If the General Assembly adopted the recommendations, the proposed increase in the present five-cent gas tax would bring in an additional \$108 million per year.

The proposed \$24 license fee would increase license fees on all cars. They now range from \$7 to \$23.

Their new recommendations call for increased diesel fuel taxes, increasing truck registration fees from 10 to 50% according to weight categories, creating a board to review classification of roads as state or local responsibility, and setting up a road priority commission.

A bill designed to run B-girls out of Illinois bars was approved unanimously by the Senate Judiciary committee. The bill would prohibit unescorted females from soliciting drinks in any bar.

approved by the House nine to eight. Dissenters said they wanted to hold up the bills until amendments could be prepared. The measures would require motorists to take drunk tests at the request of arresting officers and would lower from 15% to 10% the amount of alcohol in the blood as evidence of intoxication. Rep. Tabias Barry (D) of Lecky wanted to amend the bills to replace the blood tests with breath tests.

Gov. Otto Kerner this week released \$68,600 for construction of the new Highway Police Training Academy at Springfield. He also made \$600,000 available to the Department of Public Works and Buildings to continue right-of-way acquisition, utilities alterations and related expenses on the Kankakee River Navigation project. The new training academy is to be built on the grounds of the State Highway Police District at Lake Springfield.

A relocation service office to provide advice and information to persons displaced in the Kerr Island area by F.A. Route 151 sign quarters at 900 Main street, Venice, has been announced.

The relocation service office will have available listings of real estate for sale or rent and information regarding related cooperating agencies such as the Board of Realtors, Public Housing, lending agencies or other groups.

A representative of the Illinois Division of Highways will be in the office on Mondays and Thursdays from 2 to 4 p.m. The hours will be increased as it becomes necessary to take care of all requesting assistance may call TR 7-0768 and leave their name, address and telephone number. They will be contacted by a representative of the highway department.

All occupants of the Kerr Island area affected by the highway project will be contacted through advisory assistance prior to or at the time negotiations are begun to acquire their property.

Negotiations to purchase right-of-way will get underway this month, Kronst said, and it is expected residents will begin relocating in the latter part of July. All occupants are to be relocated by the end of this year.

Individuals and realtors who have property for rent or sale have been urged to contact the highway department representative.

### Venice Lions Discuss Riverfront Pavilion

Riverfront activities and improvements were discussed at a semi-monthly meeting of the Venice Lions Club Monday evening at American Legion Post 307 in Venice.

President Charles Billrey presided and June 17 was set as the date of a Lions-sponsored boat excursion on the "Black Finn."

The members discussed constructing a small pavilion over the newly-constructed boat ramp on the bank of the Mississippi River at Venice.

Reports were made by delegates attending the District 1-6 convention of Lions International at McMurray College in Jacksonville last week.

## Another Case of Dog Poisoning Kills Pet

A thoroughbred basset hound owned by Mr. and Mrs. Donald Patterson, 4040 Garden lane, died early this week of poison which the dog apparently picked up in the neighborhood, Mrs. Patterson said today.

Mrs. Patterson said an autopsy showed the dog died of a strong dosage of arsenic or phosphorus. The autopsy report said the dog received such a heavy dose of poison that nothing could have been done to save it.

Mrs. Patterson said the dog, the pet of her three children and many children in the neighborhood because of its gentleness, was out of the house from 2 until 4 p.m. last Sunday and became ill shortly after returning home. The dog died early Monday morning.

Many cases of dog poisoning have been reported throughout the Quad-City area in recent weeks. Several cases were reported in Granite City and at least six cases occurred in Madison where a \$1000 reward was offered for the arrest and conviction of anyone distributing poison for dogs.

### YMCA Plans Parent And Child Health Education Program

A father-son, mother-daughter health education program, one of the first of its type to be presented in the local area, will be offered by the YMCA starting next week, according to Marvin VanMetre, adult program director for the "Y."

Objectives of the three-part program are to facilitate communication between the parent and child in the areas of health, sex and social education, based on Christian values, and to assist parents in providing counsel and advice for their growing youngsters.

Program content will be presented on film and discussed by local professional men and women who will be resource leaders. The series is especially geared for mothers and their sixth, seventh and eighth grade daughters and fathers and seventh, eighth and ninth grade sons.

The schedule and topics for mothers and daughters, starting Wednesday, April 19, are: "Miracle of Reproduction," April 26—"Talking it Over" and May 3—"Social Daze."

Session for fathers and sons will start Thursday, April 20, with "Understanding Your Body," April 27—"Sons Will Become Fathers" and May 4—"Christian Attitudes."

All classes will be conducted in the YMCA beginning at 7:30 p.m. Interested persons are asked to register prior to Monday at the "Y."

Participation cost is \$3 if the parent or child is a YMCA member and \$6 for non-members. VanMetre said that non-member youngsters may apply the \$3 fee toward a YMCA membership, if they join the "Y" before the end of the course in which they participate.

### 3 Indian Guide Tribes To Hold 1st Meetings

Three new father and son Y-Indian Guide tribes have been formed, Marvin E. VanMetre, YMCA adult program director, said today. He described the response to an organizational "pow-wow" as "very good."

Y-Indian Guides is a home-centered program designed to multiply the number of activities a father and his young son can do together.

First meetings of the new tribes will be held this month to elect officers, organize programs and plan trips. Hosts for these meetings and their respective tribes are Vasil Efremoff, 2900 Michigan avenue; James Garris, 227 Pontoon road; and Vance Weiss, 2610 Jerden avenue.

VanMetre added that there is still room for a few fathers and sons (kindergarten, first and second graders) and that they may call him at the "Y" for further details.

### Divorce Granted

A divorce was granted Tuesday to Bonnie Elaine Taylor of Granite City from John Vincent Taylor of Hartford by Associate Judge Austin Lewis in the Granite City division of circuit court. They were married Aug. 16, 1960, at Belleville. Cruelly was charged. Custody of one child was given to the mother, and the father was ordered to pay \$25 per week child support.

## Consultant's Workshop Set Tomorrow at SIU-SW

Adult education, community planning and urban renewal will be discussed Friday at a Consultant's Workshop in the Development of Community Resources at Southern Illinois University-Southwestern campus. According to the workshop leader, Prof. Gordon C. Bliss of the SIU-SW Education Division, the program is designed "to provide specialized training to persons with appropriate qualifications so that they may more effectively act as consultants to local community groups in the development of local resources."

Six other such workshops have been scheduled throughout the state during the year, Bliss said. The program will get underway at 9:45 a.m. in the University Center with a welcome by Ralph W. Ruffner, vice-president of Student and Area Services at SIU-SW.

Dean Walter Beggs of the College of Education at the University of Nebraska will speak during the morning on "The Role of the Consultant and Techniques in Developing Community Resources."

Problems facing consultants and techniques and skills of consultation will be discussed further during the morning and afternoon sessions, with Katharine Yackey, John Hawley, Richard Thomas and Louis Bobka of Community Development Services, and Richard Poston, director of the University's Cooperative Community Research, serving as leaders and resource persons.

Following a dinner at 6 p.m., Prof. Hans Spiegel of the Institute of Urban Environment, School of Architecture, Columbia University, will give an address. A former deputy assistant commissioner for relocation and community organization, U. S. Urban Renewal Administration, Spiegel has served on President Johnson's Task Force in the War Against Poverty and his Commission on Cities and Urban Affairs.

The former state's attorney resigned his office last Dec. 31 following a long stage of illness.

TESTING OF TILTING mechanism and controls for one of two 22-ton basic oxygen furnaces at Granite City Steel Co. The furnace, shown here tilted on its side, is 35 feet, seven inches high, has an inside diameter of 24 feet and weighs 190 tons. It can be rotated 360 degrees at one rpm.

The rotation is required for the different positions involved in charging the scrap and molten pig iron, tapping the finished steel and dumping the slag.

The furnace is held in place by a 175-ton trunnion ring which pivots in bearings mounted on two massively-reinforced concrete foundations or piers.

Total weight on the bearings when the furnace is operating, including about 300 tons of refractory lining and 270 tons of scrap, hot metal and other materials, will be about 1150 tons, or 2,300,000 pounds.

The new BOF plant is scheduled to begin operating this year and will replace the seven open hearth furnaces.

Stanley B. Kimball, associate

professor of history and general chairman of the meeting, said reservations for meals should be made as quickly as possible. The registration fee is \$1 each for persons other than SIU students, faculty and employees. Reservations can be made by calling the Social Sciences Division, 692-2372.

SIU President Deloye Morris will give the welcoming address at the evening session. A "Vernacular Zabava" (evening party) from 9 to 10:30 p.m. will conclude activities.

Born in 1934 of an American mother and a French father, Debost began to play the flute when he was 10 years old. He was graduated from the Paris Conservatory in 1954, won first prize in flute and chamber music. Since then he has won first prizes in Moscow, Prague, Munich, Geneva, and Rome. ## CAPIULES USED TO POISON PET DOGS

To the Editor: A poisoner struck at our house last week. Our eight-year-old German shepherd and our nine-month-old Irish setter were poisoned.

"Boo-Boo," the shepherd, died within five minutes. "Sheep," the setter, is still hanging on after many hours under the care of a veterinarian.

Our ten-year-old daughter witnessed the entire sordid demise of "Boo-Boo," her constant companion since age two.

I wonder if the poisoner has been seen a little girl trying to help her suffering, convulsion-stricken pet? I have a feeling he was nearby and watching. I am certain he enjoyed every minute of it.

His choice of weapons against these "ferocious" animals, his pets, his daughter and his friends played with after school, was ingenious.

Some of the hamburger meat and capsules used have been found and are to be processed by various agencies in an attempt to bring him to justice.

Our daughter cannot understand why he did this. What explanation can he give? If he had been so kind as to tell us, we would have been able to help him.

## Favorable House Vote Awaited After Senate Approval of Floodwater Law

As Sen. Hornley (R, Springfield) pointed out in obtaining Illinois Senate approval of statewide water fluoridation, areas such as Madison and St. Clair counties need General Assembly help in this regard. We hope the House of Representatives was listening and will take similarly affirmative action.

The senator noted that 74% of Illinois residents already enjoy fluoridation benefits. Not "treating" any existing condition, the safe and dependable procedure enables people to avoid about two-thirds of future tooth decay.

Opposed principally as an "invasion of home rule," the Hornley bill adopted by the 30-20 vote of the Senate, actually could be viewed as permitting home rule. The Quad-Cities, served by the East St. Louis & Interurban Water Co., have overwhelmingly wanted fluoridation.

Public health—bad teeth eventually lead to all sorts of health problems—is a proper subject for legislative action.

Fluoridation is too important to too many people to remain stalled in areas containing 26% of the state's population. Quad-Cityans and other Illinoisans are looking to their state representatives for an early and favorable fluoridation vote.

## Has the Time Tunnel Gone Wild? Americans Getting Steadily Younger

How come everyone keeps getting younger while we get older? Facts dug up by one of the national political parties show:

1. During the next 10 years, the number of families under 35 years of age will rise 40%.

2. By 1968, the average age of the electorate will have dropped to 27 years.

3. By 1970 nearly 100 million U.S. citizens, roughly half the total population, will be under 25 years of age.

## Huge Post Office 'Giveaway' Cited

(Belleville News-Democrat) It really isn't surprising that the Post Office Department and now, to cap it all, the chronically slides deeper and faces the prospect of soon having to ante a penny more for each letter, to help even out the year's year.

Efficiencies that have been deficit incurred by the Post Office, the budget contrasted against the U.S. mail are as a drop in the bucket compared to the massive deficit incurred by the Post Office.

The Post Office is forced to ante a penny more for each letter, to help even out the year's year. The Post Office is forced to ante a penny more for each letter, to help even out the year's year.

The average American little ten years. Some of this increase is attributable to normal population growth calling for carrier route extensions. However, a preponderance has been necessitated by the mountainous burden of end.

The appalling heap of stuff which the postal carrier daily crams into his mail bags, as well as the other mailmen down the street, causes the patron to wonder.

Understandably, the householder feels imposed upon, having to get rid of all the unsolicited and unwanted clutter piled at his threshold.

Cutter is the right word; the junk isn't even properly addressed. Yet his own mail is thrown back into his face.

## Elect, Appoint III. School Board?

By NANCY EWING  
University of Illinois Student  
Both Republicans and Democrats in Illinois agree on one thing: a State Board of Education. But they differ on its selection—whether it should be appointed or elected.

"The question of how the board gets there is the real issue," comments Warren W. Wilson, an assistant superintendent of public instruction, Division of Planning and Development.

McLure explained that the Illinois Task Force on Education, which he chairs, is studying the question of how the board gets there. He expects to report on the matter soon.

## How To Succeed in Writing a Thesis Without Really Trying

(SIU Information Services)  
The zoology department faculty lounge at Southern Illinois University, Carbondale, is about as informal as you can get. It's a storeroom full of chemicals and collecting jars, with a bare, bare, bare place for making tea.

It also has an informal bulletin board—one end of a storage cabinet—for important notices. One which appears almost every year, origin, unknown, is a piece of "research definition."

It made its annual appearance in April 1967, Day, 1967, as in

## Village To Elect Board President, Clerk, Trustees

A heated contest for five village offices in the Pontoon Beach election April 13 is being waged as the result of factional differences that have developed among present village board members.

Two complete tickets are in the field, each headed by an incumbent member of the village board as candidates for board president. While this year is an "off year" for elections in most cities and villages, Pontoon Beach will elect a president and a village clerk because the city was organized four years ago resulting in expiration of the president and clerk terms this year.

Thomas Stalcoff, a candidate for re-election on a "Civic Progress" party ticket that also includes Mrs. Nancy Rosales as trustee, is running for village clerk. Roswell Bennett Jr., Anthony Jackson and Dr. Dean Rochester are candidates for village trustees.

Anthony Jackson is an incumbent member of the board.

The second ticket filed as the "Citizens Trust" ticket, is headed by incumbent village clerk Edison Phelps as candidate for board president. His ticket includes Floyd Ashoff as candidate for clerk and Harold McBride, Clyde Bradshaw and Gerald Warren for trustee. McBride is a former trustee.

Voters of Pontoon Beach will ballot in only one precinct, located at the Long Lake fire hall. The village usually casts a total vote ranging from 350 to 375. The polling place will be open Tuesday from 6 a.m. to 6 p.m.

## City Clean Air Board Plans To Meet State's Standards

A resolution calling upon the city attorney to prepare changes for the city's air pollution control law to meet the standards pertaining to particulates established by the Illinois board last month was approved Monday night by the Granite City clean air board.

Henry Bieniecki, chairman, said the changes are to be submitted to the city council for final approval. The city was advised March 27 by Clarence Klassen that standards set by the state would prevail even though the city might have more rigid restrictions.

At that time, the Granite City Air Pollution Control board had been planning to revise the city's law to meet restrictions set for particulates by the federal interstate study.

Granite City PRESS-RECORD  
Page 34 Thurs., April 13, 1967

The state's air pollution control board has set standards only for particulates and is expected to set limits of gaseous emissions within a short time.

### Reports by Adviser

The city board Monday night heard reports on industrial plants presented by Prof. Erwin Hoelscher, technical secretary. Hoelscher said a warning letter was sent March 14 to Lipsett Steel Products on its open burning operation, and that a reply was received that the practice would be discontinued with salvage operations to be carried out only when the wind was favorable.

American Steel Foundries is to submit a corrective program within a short time on its operation of oxygen lancing of its open hearth, and the post engineer of the Army Depot advised Hoelscher that steps will be taken to correct open burning operations there.

The city's technical secretary advised the board that while no permanent solution has yet been presented, that an improvement has been noted from the boiler stack at the Jennison-Wright Corp. plant.

### Boiler Stack Study

He added that Union Star and Refining Co. has been asked to have a private firm make a boiler stack study there to determine if improved methods of firing the boilers could be under taken. Hoelscher said he has received several complaints concerning particulate emissions at the starch plant and that plant officials have been cooperative with the board's requests.

Granite City Steel Co. is being asked to study possible corrective steps on emissions at its slab furnaces in the main plant. The operation is to be replaced under the firm's current modernization and expansion program. Open burning at the Nesco

Steel Barrel Co. also was observed by Prof. Hoelscher, who was advised the firm has no satisfactory waste disposal contract. The technical secretary was instructed by the board to resolve the problem.

Bieniecki said a meeting is planned for April 18 to interview an applicant for the post of full-time technical secretary for the city. Prof. Hoelscher, who is on the faculty at Washington University, is serving part-time. City council members are being invited to be present for the interview.

The board set a tentative budget of \$23,950 for the 1967-68 fiscal year to be presented to the city council. The city at the present time has made application for federal funds to aid in the air pollution control enforcement.

## 30 Attend Chouteau Island Zoning Hearing

About 30 persons appeared at a public on-site zoning hearing on Chouteau Island Tuesday morning fearing that additional land there would be used for a landfill operation.

The hearing was conducted by the Madison county zoning board of appeals on the petition of Clara Schilling, owner, and M. Fulton, purchaser, requesting to rezone the tract from agricultural district to M-3 heavy industrial district.

Howard Kaseberg, chairman of the board, told the group that the zoning board would not grant approval if Fulton plans to use the tract for landfill purposes. Another landfill in the vicinity has caused heavy criticism from Chouteau township officials and residents as it had drawn trash and garbage from Missouri.

Edward Schilling, representing his mother at the hearing, said that a combine is interested in the land for other purposes, possibly a truck terminal.

The zoning board is to present its recommendations to the Madison county board of supervisors for action at the April 24 board meeting.

She's priceless, of course. But think what it might cost to replace her. Trouble is, most men feel it's not too important to have life insurance protection for their wives. ### Engineer to Inspect Tri-City Port Area

The Tri-City Regional Port Authority board in regular meeting Monday evening selected the Sheppard, Morgan & Schwaab engineering firm to make an inspection of port facilities on the Chain of Rocks canal.

Carl Ranft, port manager, pointed out that an engineering inspection of port facilities is required periodically under the bond ordinances.

The board also rejected a request to lease part of the Industrial Park area comprising 3000 acres in Chouteau and Nameoki townships to be used for farming.

Ranft said the Port District the area involved is under control of the U. S. Army Corps of Engineers which will not permit subleasing.

Ranft announced that a committee hearing was scheduled in Springfield yesterday on bills that are expected to permit an increase from 9% to 9% in the maximum interest rates which the Port District may pay in the sale of bonds.

**OUTGROWN YOUR HOME? WANT SOMETHING BETTER?**  
It's a good day to sell and buy up.

There's an old rule-of-thumb that says you should own as much home as you can afford.

Perhaps you bought your present home a few years ago when both your family and your income were smaller. Now you want a bigger or a better home ... but somebody said, "Wait awhile."

Don't wait. Prices of homes should go up quite drastically during the next three years. The smaller home you now own will go up in value. But that bigger, better home you want will go up in value much more.

Talk to your builder or realtor. Together you can estimate the appreciation of your present home and the appreciation of the home you'd like to buy. The difference is your expected profit of "buying up" now. Subtract your cost of selling your home now ... and we think you'll come out ahead by selling and buying up to the better home.

Look into it today ... before that shoe starts pinching more!

Tight money? There's enough to go around. Let your builder or realtor get your mortgage for you.

## Youth Corps to Aid State In Cleaning Parks, Highways

The state of Illinois will have a new look this summer. Labor Secretary W. Willard Wirtz announced today that 1122 Neighborhood Youth Corps (NYC) youngsters will be beautifying parks, playgrounds, highways and schools. They will be nursing the sick, planting trees, improving lake shore lines, repairing sidewalks and bridges, and helping out in the libraries.

The U. S. Department of Labor and the Illinois Farmers' Union today signed an agreement that will put these boys and girls to work for 12 weeks this summer, beginning early in June.

They will hold down jobs as clerical, library and nurses aides — as hospital readers and as dietitians, recreation and maintenance aides.

Secretary Wirtz also said the agreement provides for a nine-week program of part-time jobs for 892 school children in the fall.

Total cost of the two-part project is \$754,925. Of this, the Labor Department will fund \$622,025 through its Manpower Administration's Bureau of Work Programs which administers the Neighborhood Youth Corps. The Illinois Farmers' Union will provide the remainder.

Raymond J. Watson, president of the Illinois Farmers' Union, Inc., Springfield, said that 80 counties in southern and central Illinois are involved and that 33 community action committees are taking an active part.

"The 1724 youngsters will fill jobs in 224 work sites including school systems, highway departments, YMCA's, hospitals, libraries, park departments, and other public and private agencies."

The jobs will be evenly divided between boys and girls. All of them are 16 through 21 years old. The Illinois Farmers' Union has already sponsored five NYC programs, making jobs available to 14,522 youths. Two of them are in operation now providing work for 250 school drop-outs, and 992 school children.

**CHATTING WITH CONGRESSMAN** Melvin Price in his Rayburn building office are Carolann Seel of Belleville and Karen Lurton, 1636 Venice avenue, who were in Washington, D. C., recently following a United Nations youth seminar in New York City.

## State Hiring Guards For Joliet Prison

Ross V. Randolph, director of the Illinois Department of Public Safety announced today, that interviewers for the state will be in this area the week of April 17 through April 21, to recruit candidates for immediate appointment to custodial officer (guard) positions at the Joliet Penitentiary.

The institution representatives will be present from 9 a.m. to 2 p.m. Wednesday, April 19, Illinois State Employment Service, 2028 Iowa street.

Guard candidates must be at least 21 years of age, in good health, and free of criminal arrest records. When appointed they will be assigned to staff positions which start at \$4980 per year and for promotion throughout their terms of service.

The Guard assignments are on a four-week, with extra pay for extra hours and include two to three weeks' vacation with pay, 12 days of annual paid sick leave, no paid holidays, three extra days for personal purposes. There are also several other fringe benefits. Uniforms are provided at no cost and living quarters are available to the Guards at \$27 per month, which includes all meals and laundry service. Spaces are also available in the trailer park at \$1 per month.

## N&W Petitions to Drop Four Passenger Trains

The Norfolk & Western Railway has filed with the Interstate Commerce Commission a proposal to discontinue four passenger trains, which serve a number of cities and towns in the middle west.

Vice-president Walter S. Clement said that the railroad's action was forced by a system-wide passenger loss in 1966 of nearly \$11 million and a two-year (1965-1966) loss on the four trains involved of more than \$1,100,000.

Two of the trains mentioned in the proposal to the ICC are Nos. 110 and 111 (Banner Blue) in the St. Louis-Chicago service and the other two—trains 301 and 304 (Cannonball) between Detroit and St. Louis.

Vice-president Clement said that "at the present time approximately 89% of all intercity travel in the U. S. is by automobile, which leaves 11% for competition by the airlines, railroads and bus lines. In Granite City, use of the passenger trains averages one

passenger on and one off daily.

"With the railroads alone providing their own rights-of-way and paying taxes on them and because airlines and buses have the advantage of public assistance and can offer more attractive fares than the railroads, the number of train travelers in the United States has been reduced to 2 1/2% of the total intercity traffic. Bus lines account for an-

other 2 1/2%, whereas the airlines' percentage has jumped to 6%, or more than railroad and bus traffic combined.

Clement said that the Norfolk & Western is endeavoring to discontinue other passenger trains, which show substantial losses in various parts of its system.

He pointed out that, even though the N&W plans to remove four trains, it will continue to

## Moore GC School Treasurer; Re-Elect Worthen, Walton

The Granite City school board reorganized for the 1967-68 year Monday night, re-electing L. Monroe Worthen as president and Dr. E. W. Walton as secretary.

With Ronald Dillard currently serving as treasurer for the fiscal year ending June 30, the board chose George Moore as the next treasurer, effective July 1.

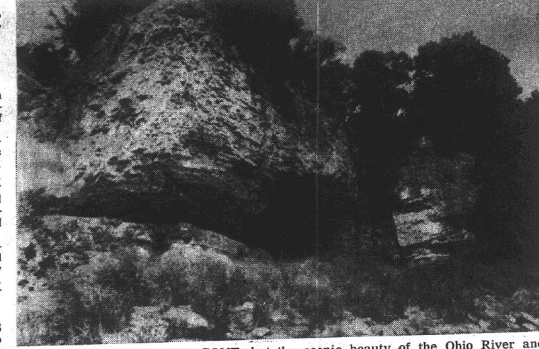

No discussion was held regarding Dillard's plans, but there has been speculation that he will resign from the board to accept a teaching position for the next school term.

As board members, neither Dillard nor Moore will receive any pay as school treasurer. Non-board members named treasurer can be paid. However, the bulk of the duties are carried out by the school district's administrative and clerical staffs.

Salary of the secretary was continued at \$240 a year, the level in effect for the last two years.

## State Capital NEWS

**Park Visitors Increase**

For the second year three Illinois state parks attracted over 1,000,000 visitors each, James W. McMillen, state parks and memorials supervisor, reported. Total 1966 attendance for state parks, memorials, conservation and access areas was 19,879,961, a new high.

Again Illinois Beach State Park between Waukegan and Zion along the Lake Michigan shore, attracted the largest attendance with its swimming, nature area and spacious lodge. Visitors numbered 1,761,372 compared to 1,511,435 in 1965.

Starved Rock remained the second most popular park with 1,580,154 persons enjoying its outstanding recreational features. Kankakee River State Park, which straddles the beautiful Kankakee River for seven miles, had over a million visitors for the first time. Attendance there was 1,101,694.

**Purple Martin Week**  
Gov. Otto Kerner has proclaimed this week as Purple Martin Week in Illinois.

"Sometimes we are inclined to regard conservation as limited to soils, water, forests, fish or game," said William T. Lodge, director of the Illinois Department of Conservation. "Programs such as Purple Martin Week impress on us that everything in nature is tied together."

resident of Illinois that feeds on the wing and is noted for its voracious appetite for insects. Some authorities claim a single bird may eat 2000 mosquitoes a day.

Griggsville, a community in Pike county, proclaims itself to be the Purple Martin Capital of the nation. The first nesting flocks usually arrive there by the second week of April.

**Eldon Hazlet Commended**  
Gov. Kerner paid tribute to the late Eldon E. Hazlet, who served as the first president of the Kaskaskia Valley Association, in ceremonies on April 1 at the closing of the Carlyle Reservoir Dam gates.

On completion of a second dam upstream at Shelbyville, the Carlyle Reservoir will be expanded to cover 26,000 acres. The Shelbyville Dam is scheduled for completion in 1969.

**Ducks and Spring Weather**  
Whether or not Illinois hunters enjoy a good duck hunting season in 1967 will depend to a large extent on spring weather conditions in the ducks' northern great plains breeding grounds, according to Frank Bellrose, wildlife specialist with the Illinois Natural History Survey.

Last year favorable water and temperature conditions helped to create the mallard population. The result was the most successful duck hunting season in Illinois in nearly a decade. This spring's migration has just passed its peak in Illinois. The unusually high migration through the state could be attributed to Illinois' sufficient water supply, a condition not found in the ducks' other forays. With the warming trend in the

latter half of March, the duck migration moved more rapidly, especially the mallards and pintails, early nesting ducks.

**Helmets and Live Motorcyclists**  
A motorcyclist who wears a safety helmet reduces his risk of being killed in an accident by more than 50%, Dr. Franklin D. Yoder, director of the Illinois Department of Public Health, said.

Registration of motorized cycles in Illinois rose from 27,081 in 1962 to 81,688 in 1966. The 34 deaths to motorcycle drivers and passengers in 1962 in the state rose to 88 in 1966, according to fatality statistics which, at this time, are not complete.

About half of the motorcycle deaths were due to head injuries. The largest number of deaths occurred in the 15-to-24 age group and of the total deaths, most were males. Collision with another motor vehicle is the most frequent type of accident and accounted for more than two-thirds of the deaths, followed by non-collision traffic accidents, such as overturning and running off the roadway.

**New Historymobile Exhibit**  
Illinois' story from 1673 to 1818 is told in a new exhibit in the State Historical Society's Robert R. McCormick Historymobile.

The new display was seen for the first time at a meeting for history students of the 36 southernmost counties of the state at Chester in Randolph county. For the next two years, the exhibit will tour the schools, campuses, county fairs and shopping centers of the state.

## Cave-in-Rock Area Combines Historic and Modern Thrills

Once the area of Cave-in-Rock, along the Illinois side of the Ohio River, across from Kentucky, was a hide-out for river pirates. Today, it combines historic thrills and modern thrills as a delightful spot for a fun weekend.

You can't help but feel that somebody is sneaking up behind to push you right over into the Ohio River when you stand on the ledge that reigns 60 feet above the old cave.

That's because this is exactly what happened here when the big cave in the rock was the "home" of notorious pirates who pounced on travelers to kill and rob them.

Showing their victims over the ledge was a favorite sport of theirs. This was tame compared to some of their bloody games.

**Poison and "Hospitality"**  
One of the earliest to use Cave-in-Rock as his headquarters was Samuel Mason, also known as Wilson. In 1787, he opened what he called a "Liquor tent" in the big cave. But he and his "hostesses" served poison along with hospitality and then disposed of the bodies in a horrendous manner.

He would slit open his victims, fill them up with rocks and then tow them out for deposit in the Ohio's midstream.

When whispers of the activities at the cavernous tavern began to get about, his business fell off so he moved farther down the river to continue his piracy.

For reward money by two of his own gang, a pair of blood-thirsty brothers known as "Big" and "Little" Harpe. It was said the Harpe Brothers killed for sheer sport.

After looting a passing river boat, they tied one of the victims to a blindfolded horse and turned both loose in the woods. While they were sitting at the mouth of their cave, dividing up the booty, the sightless horse and rider came tumbling over the cliff above, almost into their laps.

This was too much, even for their fellow outlaws, and they ran them out of camp. Both were later captured.

**—Then Semi-Respectable**  
After the Harpe gang was dissolved, a semi-respectable tent, ant took over the Cave-in-Rock area. He was James Ford, who operated a ferryboat across the Kentucky. His passengers were his piracy dupes.

Probably the last to misuse Kentucky. His passengers were a counterfeiter named "Sturdy" Sturdyman. He used the cave as his "bank," selling his homemade currency by the school gymnasium May 15.

Once they got rid of their outlaw invaders the people of Cave-in-Rock began to smile again and it seems that all 500 of the town's residents have made it a continuing habit.

**8-Minute Ferry Trip**  
They don't mind the notoriety the cave once brought, but they would much rather talk about today. They will suggest you take the modern, all-steel ferryboat trip from its downtown landing, across and back. It's an eight-minute trip each way and \$1 per carload.

They will want you to visit their Florissant landing dock which sends about 100,000 tons per year to Pittsburgh's steel mills. The unique mineral was left in the hills more than 200 million years ago when the inner earth heaved in molten masses to the near surface. The mining of it is now the area's principal industry.

Most of all, the Cave's close friends will want you to try some of their famous fried catfish, always available at the town's popular "round the clock" cafe. To get to Cave-in-Rock follow Route 1 from the north or Route 146 from the west.

For further information, write the Hardin County Chapter of the Shawnee Hills Association, Box 99, Rosiclare, or the Cave-in-Rock Chamber of Commerce. They both want to help you "Enjoy Illinois."

## Special Education To Be Area PTA Topic

The board of the Granite City Area Council of Parent-Teacher Associations will meet at the area's junior high school cafeteria Thursday, April 20, at 7:30 p.m., it was announced today by President Arthur Menendez.

Next regular meeting of the Area Council will be held at Webster grade school Thursday, April 27, at 7:30 p.m. On that occasion, a program will be presented by Special Education Director Harold Thomas and members of his staff on "Special Education."

PTA units are being urged to send a representative to the annual school district art show at the Granite City high school gymnasium May 15.

## Home Notes

By Mrs. Catherine R. Mauck  
Madison County Home Adviser,  
Home Economics Extension  
University of Illinois

### Why Do Middle-class Mothers Work?

Why do middle-class mothers want to work outside the home? Mrs. Shirley Clark, assistant professor of family relationships at the University of Illinois, suggests these reasons:

For one thing they want money. They are not, however, working to help the family achieve or maintain a subsistence level of living. Rather, their funds help to increase their standard of living or maintain a high standard. Women may also use their income to pay the debts of credit buying. Or they may want to buy a mink coat, a dishwasher, or a dryer or make a down payment on a house.

Mothers also want a greater sense of personal achievement than they get as housewives and mothers. Lack of money reward for the housewife role bothers many married women. The evidence of achievement attached to large salaries in the business world may make a housewife feel that she is incompetent.

Cooking, which used to be the most creative of household tasks, no longer seems to take specific talents beyond following directions well. The repetition of washing, ironing and cleaning chores may be boring. Middle-class mothers generally do more cleaning than they need to for the health of their families or the appearance of their homes. Mothers who are working by choice generally report that they think that they are more efficient about their household tasks. They find it doesn't take so long to do these tasks since they have been working.

Education and the need for achievement seem to be associated. Family relationship specialists don't know whether one precedes the other. Probably many women who are well trained or well educated feel that working at home alone doesn't allow them to live up to their potential skill. They may feel that it's a waste to spend all their time on the care of a single family.

Working outside the home often provides a welcome contrast to home life. The woman's working day starts and stops at set times. Work outside the home involves interaction with many people. Sometimes just traveling between home and work provides a welcome change of scenery.

In their day-to-day experiences, mothers can easily lose sight of the long-range view of motherhood. There are many times when a mother of small children feels that she is irreplaceable. But she may feel lost when the last child enters school and she is left with a full day of housework instead of mothering to do. It is possible that the greater her joys as a mother, the more empty her day is after the children are in school, and the greater her motivation to work outside home.

If she has felt frustrated at being tied down at home, at having suffered the loss of her independence for a number of years, she may be eager to move into the world of work to release these frustrations.

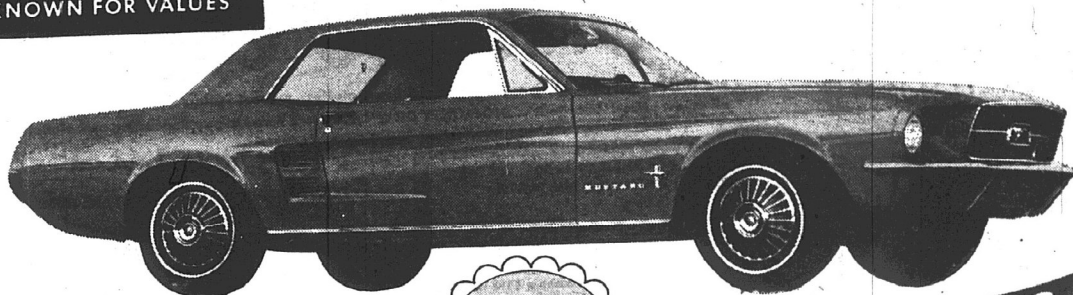

A survey by home economists at Southern Illinois University shows that women with only a grade school education earn an average of less than \$1000 per year, while college graduates average \$4000.
